## METADATA for the measures in the ADASS / AQUA whole system quality and efficiency scorecard

Measure name	Data Source	Geography/Location	Data parameters/specification for source data	Data equation/calculation	Date range	Data Caveats
(a) Non-elective admissions aged 65+ per 1000 population aged 65+	SUS	By local authority boundary based on the address of the patient	Number of non-elective admissions to any hospital of patients aged 65 and over living within the local authority area.	1. non-elective admissions aged 65 and over / population 65 and over *1000	Jan 13 - Dec 13	<p>All of the data for measures (a)-(d) is extracted from the SUS data system and so the last two months data are potentially subject to significant change. The last month of this data will have two more refreshes from local systems onto SUS and the data from the second to last month will have a final refresh. This will effect the data in this scorecard for these measures meaning admissions, bed days and repeats may appear lower or higher than they will actually be. THE DATA IN THIS SCORECARD FOR MEASURES (c) AND (d) WILL BE DIFFERENT TO THE APRIL-11 DRAFT VERSION DUE TO A CHANGE OF METHODOLOGY FOR CALCULATING REPEATS</p> <p>From April 2013 Cumbria is accessed via PbR tables. These only contain data for Cumbria CCG patients and may exclude small numbers of Local Authority residents.</p>
